## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 1-Methyl-2-(3-pyridyl)pyrrolidine 3-(1-Methyl-2-pyrrolidyl)pyridine	Liquid	Colorless to brown	Fishy odor
Mixes with water.			
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID.</b> Wear rubber overclothing (including gloves). Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED WHEN HEATED. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Nickel tetracarbonyl	Liquid  Colorless to yellow  Musty, stale odor  Sinks in water. Poisonous, flammable vapor is produced.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources. Call fire department. Evacuate area in case of large discharge. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Cool exposed containers with water. Flood discharge area with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Nitrocarbol	Watery liquid      Colorless      Strong odor  Sinks and mixes slowly with water. Irritating vapor is produced.
Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources and call fire department. Avoid contact with vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	<b>FLAMMABLE</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear self-contained breathing apparatus. Evacuate surrounding area in large fire. Combat fires from behind barrier. Extinguish with water, foam, dry chemicals, or carbon dioxide. Cool exposed containers with water. Continue cooling after fire has been extinguished.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> Irritating to eyes, nose and throat. Harmful if inhaled. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> No appreciable harm to skin or eyes. Harmful if swallowed. Flush affected areas with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

NOX

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Dinitrogen tetroxide Nitrogen dioxide Nitrogen peroxide Oxides of nitrogen Red oxide of nitrogen	Liquefied compressed gas Red-brown Sharp, unpleasant chemical odor  Sinks and reacts with water. Poisonous brown vapor is produced.
<b>Keep people away. AVOID CONTACT WITH LIQUID AND VAPOR.</b> <b>Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves).</b> <b>Evacuate area in case of large discharge.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	Not flammable. May cause fire and explode on contact with combustibles. <b>POISONOUS GASES ARE PRODUCED IN FIRE AND WHEN HEATED.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Flood discharge area with water. Stop flow of gas or liquid. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  VAPOR POISONOUS IF INHALED. Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. POISONOUS IF SWALLOWED. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Rubber gloves; safety goggles and face shield; protective clothing; acid gas canister respirator or self-contained breathing apparatus.
- 3.2 **Symptoms Following Exposure:** Very concentrated fumes produce coughing, choking, headache, nausea, pain in chest and abdomen; otherwise, few symptoms appear at time of exposure. After symptom-free period of 5-72 hours, pulmonary edema gradually develops, causing fatigue, restlessness, coughing, difficulty in breathing, frothy expectoration, mental confusion, lethargy, bluish skin, and weak, rapid pulse. Since NOX interferes with gas exchange in lungs, unconsciousness and death by asphyxiation can result, usually within a few hours after onset of pulmonary edema.
- 3.3 **Treatment of Exposure:** INHALATION: remove patient to fresh air and have him breathe as deeply as possible; call a doctor; enforce complete rest for 24-48 hours; keep warm; give oxygen if coughing starts; physician may administer morphine (10 mg.) EYES AND SKIN: flush with water for at least 15 min.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Propane, 1-nitro-	Liquid  Colorless  Mild, fruity odor  May float or sink in water, depending on temperature. Slowly mixes with water.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear full protective clothing with self-contained breathing apparatus. (AVOID CARBON-TYPE RESPIRATOR WITH HOPCALITE CATALYST.) Shut off ignition sources. Call fire department. Evacuate area. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Vapor may explode if ignited in an enclosed area. Flashback along vapor trail may occur. Extinguish with water spray, fog or alcohol foam; also may use CO <sub>2</sub> for small fire. Dry chemicals may react in the presence of water to produce salts which may explode when dry. Cool exposed containers with water spray. Combat fires from a safe distance or protected location.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes and respiratory system. If inhaled, will cause headache, nausea, vomiting, and diarrhea. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of running water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed, will cause headache, dizziness, nausea, vomiting, diarrhea, restlessness and muscular uncoordination. If swallowed and victim is CONSCIOUS, give large volumes of water and induce vomiting. If swallowed and the victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm. If in EYES, hold eyelids open and flush with plenty of running water for at least 15 minutes. If on SKIN, wash with soap or mild detergent under running water for at least 15 minutes. Remove and isolate contaminated clothing and shoes.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Fouling to shoreline. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 Personal Protective Equipment:** Wear self-contained breathing apparatus and full protective clothing including helmet, coat and pants worn by fire fighters, rubber boots, gloves, bands around legs, arms and waist along with face mask and coverings for parts of neck and head not protected by other apparel. Carbon type respirators containing HOPCALITE, an oxide catalyst that converts carbon monoxide to carbon dioxide, should not be used with high vapor concentrations of 1-nitropropane because the resulting reaction may cause a fire.
- 3.2 Symptoms Following Exposure:** Inhalation causes headache, dizziness, nausea, vomiting, diarrhea, restlessness, muscular uncoordination and irritation of the respiratory tract. Contact causes irritation of the eyes and skin. Ingestion may cause headache, dizziness, nausea, vomiting, restlessness and muscular uncoordination.
- 3.3 Treatment of Exposure:** INHALATION: Move victim to fresh air; call emergency medical care. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. EYES: Immediately begin to flush eyes with running water; lift upper and lower eyelids occasionally. Continue to wash for at least 15 minutes. SKIN: Wash immediately with running water and soap or mild detergent. Continue for at least 15 minutes. Remove and isolate contaminated clothing and shoes. INGESTION: If the victim is CONSCIOUS, give large volumes of water and induce vomiting. If the victim is UNCONSCIOUS, keep the victim warm. Get immediate medical attention.
- 3.4 TLV-TWA:** 25 ppm  
**3.5 TLV-STEL:** Not listed.  
**3.6 TLV-Ceiling:** Not listed.  
**3.7 Toxicity by Ingestion:** Grade 3; LD<sub>50</sub> = 455mg/kg (rat)

**3.9 Chronic Toxicity:** Causes liver, kidney and heart damage.  
**3.10 Vapor (Gas) Irritant Characteristics:** Vapor causes moderate irritation such that personnel will find high concentrations unpleasant.

### 4. FIRE HAZARDS

- 4.1 Flash Point:** 120°F O.C.  
96°F C.C  
**4.2 Flammable Limits in Air:** 2.2% (LFL)  
**4.3 Fire Extinguishing Agents:** Small fires: carbon dioxide, CO<sub>2</sub>, water spray or alcohol foam. Large Fires: Water spray, fog, or alcohol foam. Unmanned nozzles should be used for a massive fire in a cargo area. Fires should be fought from an explosion-resistant location.  
**4.4 Fire Extinguishing Agents Not to Be Used:** Do not use dry chemicals because some of them may react with water to make the fire worse. In the presence of water, inorganic bases react with nitropropane to produce salts which are explosive when dry.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Isopropyl nitropropane sec-Nitropropane 2-NP	Liquid  Colorless  Mild, fruity odor  May float or sink in water.
Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources. Call fire department. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, coughing, or difficult breathing. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed will cause nausea, and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Vapor may explode if ignited in an enclosed area.  
Wear goggles and self-contained breathing apparatus.  
Extinguish with dry chemicals, foam or carbon dioxide.  
Water may be ineffective on fire.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.

#### VAPOR

Irritating to eyes, nose and throat.  
If inhaled will cause coughing or difficult breathing.  
If in eyes, hold eyelids open and flush with plenty of water.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.

#### LIQUID

Irritating to skin and eyes.  
If swallowed will cause nausea and vomiting.  
Remove contaminated clothing and shoes.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.  
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

### Water Pollution

Effect of low concentrations on aquatic life is unknown.  
Fouling to shoreline.  
May be dangerous if it enters water intakes.  
Notify local health and wildlife officials.

## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Liquid Gold to black

May float or sink in water.

Keep people away. Avoid contact with liquid and vapor.  
Call fire department.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

Combustible.  
Extinguish with dry chemicals, foam or carbon dioxide.  
Water may be ineffective on fire.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.

VAPOR  
Irritating to eyes, nose and throat.  
If inhaled will cause coughing or difficult breathing.  
If in eyes, hold eyelids open and flush with plenty of water.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.

LIQUID  
Irritating to skin and eyes.  
If swallowed will cause nausea.  
Remove contaminated clothing and shoes.  
Flush affected areas with plenty of water.  
IF IN EYES, hold eyelids open and flush with plenty of water.  
IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.  
IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

### Water Pollution

HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> n-Octane	Liquid	Colorless	Gasoline-like odor
Floats on water. Flammable, irritating vapor is produced.			
Keep people away. Avoid contact with liquid. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	Call for medical aid.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause headache, dizziness, difficult breathing, or loss of consciousness. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed will cause nausea, and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Anacardic acid Cashew nutshell liquid Cashew nutshell oil Oil of cashew nutshell o-Pentadecadienyl salicylic acid	Liquid                      Black
<p><b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID OR VAPOR.</b>  Wear self-contained positive pressure breathing apparatus and special protective clothing.  Shut off ignition sources and call fire department.  Stay upwind out of low areas and use water spray to "knock down" vapor.  Notify local health and pollution control agencies.  Protect water intakes.</p>	
<b>Fire</b>	<p>Combustible  Poisonous gases may be produced in fire or when heated.  Containers may explode in fire. (Polymerizes at high temperatures.)  Wear self-contained positive pressure breathing apparatus and special protective clothing.  Extinguish with dry chemical, carbon dioxide, water spray, fog or foam.  Combat fires from safe distance or protected location.  Cool exposed containers with water.</p>
<b>Exposure</b>	<p>CALL FOR MEDICAL AID</p> <p>VAPOR  May be harmful if inhaled.  May cause skin to blister (sensitive individuals).  May irritate eyes, nose and throat.  Move to fresh air.  If breathing has stopped, give artificial respiration.  If breathing is difficult, give oxygen.</p> <p>LIQUID  Toxic and irritating. If swallowed, cardol, a principal constituent, produces severe gastroenteritis.  Produces severe inflammation of the skin with subsequent blisters and desquamation - similar to poison ivy exposure.  May burn eyes.  Remove and isolate contaminated clothing and shoes.  Flush contaminated area with plenty of running water for at least 15 minutes.  IF IN EYES, hold eyelids open and flush with water.  IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.  Effects may be delayed; keep victim under observation.</p>
<b>Water Pollution</b>	<p>Effect of low concentrations on aquatic life is unknown.  May be dangerous if it enters water intakes.  Notify local health and wildlife officials.  Notify operators of nearby water intakes.</p>

- 3.1 **Personal Protective Equipment:** Wear positive pressure breathing apparatus and special protective clothing.
- 3.2 **Symptoms Following Exposure:** Inhalation: May irritate mucous membranes; it is extremely acid and corrosive. Toxic; may be harmful if inhaled. Eyes: May cause burns to eyes. Skin: Produces severe inflammation of the skin with subsequent blisters and desquamation. Symptoms resemble poison ivy exposure effects. Ingestion: Toxic and irritating, Cardol, a major constituent, produces severe gastroenteritis.
- 3.3 **Treatment of Exposure:** Call emergency medical care. Inhalation: Move victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. EYES or SKIN: Immediately flush with running water for at least 15 minutes; hold eyelids open periodically, if appropriate. Speed in removing material from skin is of extreme importance. Remove and isolate contaminated clothing and shoes at the site. Keep victim quiet and maintain normal body temperature. Effects may be delayed; keep victim under observation.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Goggles or face shield; rubber gloves and any other protective clothing to prevent contact with skin.
- 3.2 **Symptoms Following Exposure:** Contact of liquid with eyes causes severe irritation. May induce severe skin irritation, inflammation, swelling, and pustule formation. Absorption through the skin may cause purging. Ingestion causes burning of the mouth and stomach and drastic purging, possibly leading to collapse and death. Small doses have a strong laxative effect.
- 3.3 **Treatment of Exposure:** EYES: flush with water; a 2.5% hydroxycortisone ointment is recommended. SKIN: remove as much liquid as possible from skin by use of a good solvent such as acetone or alcohol; wash with soap and water. INGESTION: for gastrointestinal symptoms, use demulcents; further treatment is symptomatic; do NOT induce vomiting.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Fuming sulfuric acid	Oily liquid	Colorless to cloudy	Sharp, choking odor
Mixes and reacts with water producing heat. Irritating mist is produced.			
<b>Evacuate.</b> <b>Keep people away. AVOID CONTACT WITH LIQUID AND MIST.</b> <b>Wear chemical protective suit with self-contained breathing apparatus.</b> <b>Stay upwind and use water spray to "knock down" mist.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>			
<b>Fire</b>	Not flammable. May cause fire on contact with combustibles. Flammable gas may be produced on contact with metals. Wear chemical protective suit with self-contained breathing apparatus. DO NOT USE WATER ON ADJACENT FIRES.		
<b>Exposure</b>	CALL FOR MEDICAL AID. MIST Irritating to eyes, nose and throat. If inhaled, will cause coughing or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration (but NOT mouth to mouth). If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Arizole Oleum abietis UN 1272 (DOT) Unipine Yarmor Yarmor pine oil	Liquid  Colorless to pale yellow Turpentine like odor  Floats on water.
Keep people away. Call fire department. Avoid contact with liquid and vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. Water may be ineffective on fire. Wear self contained breathing apparatus and protective clothing. Extinguish with dry chemical, alcohol foam, or CO <sub>2</sub> . Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, difficult breathing or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED, do not induce vomiting.
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

3.1 **Personal Protective Equipment:** Organic canister or air-supplied mask; goggles or face shield; rubber gloves.  
 3.2 **Symptoms Following Exposure:** Vapors can cause headache, confusion, respiratory distress. Liquid irritates skin. If ingested, can irritate the entire digestive system and may injure kidneys. If liquid is taken into lungs, causes severe pneumonitis, pulmonary edema/hemorrhage.  
 3.3 **Treatment of Exposure:** INHALATION: remove victim to fresh air, call a doctor, administer artificial respiration and oxygen if required. INGESTION: Do not induce vomiting. If vomiting occurs spontaneously, keep victim's head below his hips to prevent his breathing vomitus into his lungs; call a doctor. EYES: Flush with water for at least 15 min. SKIN: Wipe off, wash with soap and water.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Fuel oil no. 1 JP-1 Kerosene Kerosine	Watery liquid      Colorless      Kerosene odor  Floats on water.
Keep people away. Avoid contact with liquid. Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. Extinguish with foam, dry chemical, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Caprylene alpha-Octylene	Liquid  Colorless  Gasoline-like odor  Floats on water. Flammable, harmful vapor is produced.
<b>Fire</b>  Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Avoid contact with liquid and vapor. Notify local health and pollution control agencies. Protect water intakes.  FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.	
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR If inhaled, will cause dizziness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. If swallowed, will cause nausea or vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethanedioic acid	Solid crystals	White	Odorless
Sinks and mixes with water.			
Keep people away. Avoid contact with solid and dust. Wear goggles, self-contained breathing apparatus and rubber overclothing (including gloves). Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Not flammable. Poisonous gases are produced in fire. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves).		
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST Will burn eyes, nose and throat. If inhaled, will cause difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID Will burn skin and eyes. If swallowed, will cause nausea or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethylcarbinol 1-Propanol Propyl alcohol	Liquid  Colorless  Alcohol odor  Mixes with water. Flammable, irritating vapor is produced.
<b>Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Avoid contact with liquid and vapor. Notify local health and pollution control agencies. Protect water intakes.</b>	
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, and throat. If inhaled, will cause nausea, dizziness, or headache. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn eyes. Harmful if swallowed. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethane pentachloride Ethane, pentachloro- Pentalin	Liquid	Colorless	Sweet chloroform-like odor
Sinks in water.			
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear positive pressure breathing apparatus and special protective clothing. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Not flammable. POISONOUS GASES ARE PRODUCED IN FIRE OR WHEN HEATED TO DECOMPOSITION.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS; MAY BE FATAL IF INHALED OR ABSORBED THROUGH SKIN. Irritating to eyes, skin, lungs and mucous membrane. Narcotic effect greater than chloroform. More potent central nervous system depressant than chloroform or tetrachloroethane. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open if necessary.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to skin and eyes. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open if necessary. Speed in removing material from skin is of extreme importance. Remove and isolate contaminated clothing and shoes at the site. Effects may be delayed; keep victim under observation. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Thiocarbonyl tetrachloride Trichloromethyl sulfur chloride Trichloromethanesulfenyl chloride Trichloromethane sulfuryl chloride Trichloromethyl sulfochloride	Liquid Yellow to orange-red Strong unpleasant odor  Sinks in water. Poisonous vapor is produced.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Evacuate area in case of large discharge. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Organic and acid-type canister mask or self-contained breathing apparatus; goggles or face shield; rubber gloves.
- 3.2 **Symptoms Following Exposure:** Inhalation may cause severe irritation of upper respiratory tract; brief exposure to low concentrations may produce central nervous system depression and lung, liver, and heart congestion. Severe exposures may be fatal. Contact of liquid with eyes causes immediate eye irritation and severe conjunctivitis; if not promptly washed away, severe corneal damage may result. Liquid also causes severe local skin irritation; may be absorbed through skin in quantities sufficient to produce systemic poisoning. Ingestion may cause damage to the membranes of the mouth, throat, and gastrointestinal tract. Pain and burning of the mouth and throat, nausea, vomiting, cramps and diarrhea may occur. In severe cases, tissue ulceration and central nervous system depression may result.
- 3.3 **Treatment of Exposure:** Get medical attention at once following all exposures to this compound.  
 INHALATION: remove victim to fresh air; give mouth-to-mouth resuscitation if needed. EYES: flush with water for 15 min; if physician is not available, flush for another 15 min. SKIN: flush with water. INGESTION: give large amounts of water, then induce vomiting until vomitus is clear; give milk, eggs, or olive oil to soothe stomach.

# 1,3-PENTADIENE

PDE

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> alpha-Methylvinyl 1-Methylbutadiene cis-Pentadiene-1,3 trans-Pentadiene-1,3 Piperylene	Liquid  Colorless  Floats on water.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear self-contained positive pressure breathing apparatus and full protective clothing. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Containers may explode in fire. Water may be ineffective on fire. Combat fires from behind barrier or protected location. Extinguish small fires: dry chemical, CO <sub>2</sub> , water spray, or foam; large fires: water spray, fog or foam. Wear self-contained positive pressure breathing apparatus and full protective clothing. Move container from fire area if you can do it without risk. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR May cause dizziness or suffocation. May irritate eyes and skin. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID May irritate skin and eyes. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open if necessary. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes at the site.
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Poly(ethyleneimine) Polyethyleneimine	Liquid  Yellowish  Amine odor  Miscible in water.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear self-contained positive pressure breathing apparatus and full protective clothing. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	COMBUSTIBLE POISONOUS GASES ARE PRODUCED IN FIRE. Poisonous gas may be produced in fire or when heated. Wear self-contained positive pressure breathing apparatus and full protective clothing. Extinguish small fires: dry chemical, CO <sub>2</sub> , water spray or alcohol foam; large fires: water spray, fog or alcohol foam. Move container from fire area if you can do it without risk. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR May be harmful if inhaled. May irritate eyes and skin. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen. Move to fresh air.  LIQUID Irritating to eyes and skin. May be harmful if swallowed. IF IN EYES OR ON SKIN: flush with plenty of running water for at least 15 min.; hold eyelids open if necessary. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes at the site. Keep victim quiet and maintain normal body temperature. IF SWALLOWED and victim is CONSCIOUS, have victim drink water and induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effects of low concentration on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and pollution control officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Carbonyl chloride Chloroformyl chloride	Liquefied compressed gas  Colorless gas, or light yellow liquid  Sweet or sharp odor  Liquid sinks in water. Poisonous vapor is produced. Boiling point is 47°F.
<b>Keep people away. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles and self-contained breathing apparatus. Evacuate area in case of large discharge. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable. POISONOUS GASES ARE PRODUCED WHEN HEATED. Wear goggles and self-contained breathing apparatus. Cool exposed containers and protect men effecting shutoff with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED. Irritating to eyes, nose, and throat. Effects may be delayed. Move to fresh air. If breathing has stopped, give artificial respiration (but NOT mouth-to-mouth). If breathing is difficult, give oxygen. Maintain absolute rest until medical aid arrives.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 2-Methylaziridine 2-Methylethyleneimine	Liquid  Colorless  Strong ammonia-like odor  Mixes with water. Flammable, irritating vapor is produced.
Evacuate. KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR. Wear rubber overclothing (including gloves). Shut off ignition sources. Call fire department. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Irritating gases are produced when heated. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Combat fires from safe distance or protected location. Extinguish with dry chemicals or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause nausea, vomiting or difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Australene 2-Pinene alpha-Pinene 2,6,6-Trimethylbicyclo [3.1.1]hept-2-ene, 9cl	Oily liquid Colorless Turpentine odor  Floats on water.
<p>Keep people away.  Shut off ignition sources and call fire department.  Evacuate area.  Avoid contact with liquid and vapor.  Notify local health and pollution control agencies.  Protect water intakes.</p>	
<b>Fire</b>	COMBUSTIBLE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Water may be ineffective on fire. Extinguish with dry chemical, alcohol foam, or CO <sub>2</sub> . Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water.
<b>Water Pollution</b>	May be dangerous to aquatic life in high concentrations. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID OR DUST.</b> Wear self-contained breathing apparatus and protective clothing. Call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Emits toxic fumes under fire conditions. Wear self-contained breathing apparatus and protective clothing. Extinguish fires with water spray, CO <sub>2</sub> , dry chemical, or foam.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID</b> DUST POISONOUS IF INHALED OR SKIN IS EXPOSED Will blister skin upon prolonged contact. IF IN EYES: hold eyelids open, flush with running water for at least 15 minutes. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>SOLID</b> POISONOUS IN SWALLOWED OR ABSORBED THROUGH THE SKIN Will blister skin upon prolonged contact. IF IN EYES: hold eyelids open, flush with running water for at least 15 minutes. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk and induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Propane-1-thiol 1-Propanethiol	Liquid  Colorless  Skunk-like odor  Floats on water. Flammable, irritating vapor is produced.
Evacuate. Keep people away. Avoid contact with vapor. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	Call for medical aid.  VAPOR If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected area with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Ethyl acetone Methyl n-propyl ketone	Liquid  Colorless  Powerful ethereal, fruity odor.  Floats on water.
Wear full impervious protective clothing and approved respirator. Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Flammable. Vapors can flow to distant ignition source and flash back. Containers may rupture when overheated. Wear full protective clothing with self-contained breathing apparatus. Extinguish fire with dry chemical, alcohol foam, carbon dioxide. Use water spray to cool exposed containers.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Remove contaminated clothing and shoes. Wash affected areas with soap and water. IF IN EYES, hold eyelids open and flush with plenty of water.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 1,2-Epoxypropane Methyloxirane Propyleneoxide	Liquid  Colorless  Sweet, alcohol odor  Mixes with water. Flammable, irritating vapor is produced.
Evacuate. Keep people away. <b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Combat fires from safe distance or protected location. Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, and throat. If inhaled, will cause headache, nausea, vomiting, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> PAPI	Liquid	Dark brown	Weak odor
Sinks in water.			
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Combustible. Containers may explode in fire. Extinguish with dry chemicals or carbon dioxide. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Methylethylene Propene	Liquefied compressed gas Colorless Mild odor  Floats and boils on water. Flammable, visible vapor cloud is produced.
<b>Keep people away.</b> <b>Shut off ignition sources and call fire department.</b> <b>Stay upwind and use water spray to "knock down" vapor.</b> <b>Evacuate area in case of large discharge.</b> <b>Avoid contact with liquid.</b> <b>Notify local health and pollution control agencies.</b>	
<b>Fire</b>	<b>FLAMMABLE.</b> Container may explode in fire. Flashback along vapor trail may occur. May explode if ignited in an enclosed area. Stop flow of gas if possible. Cool exposed containers and protect men effecting shutoff with water. Let fire burn.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Will cause frostbite. Flush affected areas with plenty of water. <b>DO NOT RUB AFFECTED AREAS.</b>
<b>Water Pollution</b>	Not harmful to aquatic life.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Dimethylmethane	Liquefied flammable gas	Colorless	Odorless-may have skunk odor added
Liquid floats and boils on water. Flammable visible vapor cloud is produced.			
Evacuate. Keep people away. Avoid contact with liquid and gas. Avoid inhalation. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies.			
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Stop flow of gas if possible. Cool exposed containers and protect men effecting shut-off with water. Let fire burn.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Not irritating to eyes, nose or throat. If inhaled, will cause dizziness, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID May cause frostbite. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS.		
<b>Water Pollution</b>	Not harmful to aquatic life.

## CAUTIONARY RESPONSE INFORMATION

### Common Synonyms

Liquid                      Colorless                      Gasoline odor

Floats on water. Flammable vapor is produced. Boiling point is 97°F.

Evacuate.  
Keep people away.  
Shut off ignition sources and call fire department.  
Stay upwind and use water spray to "knock down" vapor.  
Avoid contact with liquid and vapor.  
Notify local health and pollution control agencies.  
Protect water intakes.

### Fire

FLAMMABLE.  
Flashback along vapor trail may occur.  
Containers may explode when heated.  
Vapor may explode if ignited in an enclosed area.  
Extinguish with foam, dry chemical or carbon dioxide.  
Water may be ineffective on fire.  
Cool exposed containers with water.

### Exposure

CALL FOR MEDICAL AID.  
  
VAPOR  
If inhaled, will cause dizziness or difficult breathing.  
Move to fresh air.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.  
  
LIQUID  
Harmful if swallowed.  
IF SWALLOWED and victim is CONSCIOUS, have victim drinkwater or milk.  
DO NOT INDUCE VOMITING.

### Water Pollution

Effect of low concentrations on aquatic life is unknown.  
May be dangerous if it enters water intakes.  
Notify local health and wildlife officials.  
Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Self-contained breathing apparatus or air-line mask; goggles or face shield; rubber gloves and protective clothing
- 3.2 **Symptoms Following Exposure:** Inhalation of low concentrations causes dizziness, blurred vision, nausea, fatigue, light headedness or nervousness; higher concentrations also cause abnormal muscular contractions or twitching of any part of the body, difficult breathing, poor muscular coordination, imperfect articulation of speech, convulsions, and (rarely) coma. Contact with liquid causes severe irritation of eyes and irritation of skin (acute local inflammation with the formation of small blisters, redness and swelling). Can be absorbed through the skin. Compound cannot be swallowed, because it is spontaneously flammable in air.
- 3.3 **Treatment of Exposure:** Get medical attention following all exposures to this compound. INHALATION: remove victim to fresh air; watch for delayed symptoms for 1-2 days. EYES: wash with copious quantities of water for at least 30 min., holding eyelids apart to insure thorough flushing. SKIN: wash immediately with soap and water; rinse affected area with a 3% ammonia solution followed by additional flushing with water.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Wear dry cotton gloves and U.S. Bureau of Mines approved dust respirator when handling solid potassium cyanide. Wear rubber gloves and approved chemical safety goggles when handling solutions.
- 3.2 **Symptoms Following Exposure:** Is a rapidly fatal poison when taken into the digestive system. Dust may cause toxic symptoms when inhaled, and prolonged contact with the skin may cause irritation and possibly poisoning if skin is broken. Strong solutions are corrosive to skin and may cause deep ulcers that heal slowly.
- 3.3 **Treatment of Exposure:** INGESTION: call physician immediately; have victim lie down and keep him quiet and warm. If he is CONSCIOUS, induce vomiting by having him drink warm salt water (1 tablespoon per cup of water); repeat until vomit fluid is clear; then give orally 1 pint of 1% solution of sodium thiosulfate, to be repeated in 15 min. If victim is NOT BREATHING, give artificial respiration until breathing starts. If victim is UNCONSCIOUS BUT BREATHING, give oxygen from an inhalator if he does not respond to treatment. In all cases, break an amyl nitrite pearl\* in a cloth and hold lightly under victim's nose for 15 sec., repeating 5 times at about 15-sec. intervals; if necessary, repeat procedure every 3 min. with fresh pearls until 3 or 4 have been used. \*Amyl nitrite pearls must not be over 2 years old. Avoid breathing the vapor while administering it to the victim.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> alpha-n-Amylene Propylethylene	Liquid Colorless Gasoline odor  Floats on water. Flammable vapor is produced. Boiling point is 86°F.
Evacuate. Keep people away. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Avoid contact with vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. Flashback along vapor trail may occur. Containers may explode when heated. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR If inhaled, will cause dizziness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Harmful if swallowed. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Neoprene-coated gloves; rubber work shoes or overshoes; latex rubber apron; goggles; respirator or mask approved for toxic dusts and organic vapors
- 3.2 **Symptoms Following Exposure:** Inhalation of mist, dust, or vapor (or ingestion, or absorption through the skin) cause dizziness, usually accompanied by constriction of the pupils, headache, and tightness of the chest. Nausea, vomiting, abdominal cramps, diarrhea, muscular twitchings, convulsions and possibly death may follow. An increase in salivary and bronchial secretions may result which simulate severe pulmonary edema. Contact with eyes causes irritation.
- 3.3 **Treatment of Exposure:** Call a doctor for all exposures to this compound. INHALATION: remove victim from exposure immediately; have physician treat with atropine injections until full atropinization; 2-PAM may also be administered by physician. EYES: flush with water immediately after contact for at least 15 min. SKIN: remove all clothing and shoes immediately; quickly wipe off the affected area with a clean cloth; follow immediately with a shower, using plenty of soap. If a complete shower is impossible, wash the affected skin repeatedly with soap and water. INGESTION: if victim is conscious, induce vomiting and repeat until vomit fluid is clear; make victim drink plenty of milk or water; have him lie down and keep warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Nonene (nonlinear) Propylene trimer Tripropylene	Liquid                      Colorless                      Gasoline-like odor  Floats on water. Flammable, irritating vapor is produced.
<p>Keep people away.  Avoid inhalation.  Shut off ignition sources and call fire department.  Stay upwind and use water spray to "knock down" vapor.  Avoid contact with liquid and vapor.  Notify local health and pollution control agencies.  Protect water intakes.</p>	
<b>Fire</b>	<b>FLAMMABLE:</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> Irritating to eyes, nose and throat. If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Sodium meta arsenite Sodium ortho arsenite	Solid  White to gray  Odorless  Mixes with water.
<b>KEEP PEOPLE AWAY.</b> <b>AVOID CONTACT WITH SOLID AND DUST.</b> Wear goggles and dust respirator. Stay upwind. Use water spray to "knock down" dust. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable. POISONOUS GASES MAY BE PRODUCED WHEN HEATED.
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing is difficult, give oxygen.  SOLID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Wear self-contained positive pressure breathing apparatus and full protective clothing.
- 3.2 **Symptoms Following Exposure:** Very high acute toxicity either as the dust or in solution. The lethal dose is essentially the same for exposure via inhalation, ingestion or skin contact. Contact with the eyes can also affect the body. Absorption is very rapid by the gastrointestinal tract; but skin absorption is slow unless the skin is cut or abraded. Symptoms may be delayed 30 minutes to 2 hours after ingestion; and may include vomiting, apprehension, auditory hallucinations, nystagmus, tingling sensations of the nose and face, facial numbness and twitching, and epileptiform convulsions. Several hours later, there may be pulsus alternans, ectopic heartbeats, tachycardia, ventricular fibrillation, and death. Autopsy findings pursuant to a lethal ingestion included hemorrhagic pulmonary edema and degeneration of renal tubules.
- 3.3 **Treatment of Exposure:** INHALATION: Move victim to fresh air; call emergency medical care. If breathing has stopped, give artificial respiration. EYES OR SKIN: Immediately flush eyes or skin with running water for at least 15 minutes; hold eyelids open periodically if appropriate. Remove and isolate contaminated clothing and shoes at the site. INGESTION: If victim is CONSCIOUS, have victim drink large quantities of water and induce vomiting by touching the back of the throat. If victim is UNCONSCIOUS, do nothing except keep victim quiet and maintain normal body temperature.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Protective gloves when handling solid sodium cyanide; rubber gloves when handling cyanide solutions (wash hands and rubber gloves thoroughly with running water after handling cyanides); U.S. Bureau of Mines approved dust respirator; approved chemical safety goggles.
- 3.2 **Symptoms Following Exposure:** As little as 180 milligrams is a rapidly fatal poison if ingested. Non-lethal doses may cause toxic symptoms. Strong water solutions, or the solid itself, can be absorbed by the skin and cause deep ulcers which heal slowly.
- 3.3 **Treatment of Exposure:** INGESTION: start treatment immediately; call a physician; carry victim to fresh air; have him lie down; keep him quiet and warm until physician arrives. If victim is conscious and breathing: induce vomiting by giving emetic of warm salt water (1 tablespoon salt/cup water); repeat until vomit fluid is clear; then have victim drink one pint of 1% solution of sodium thiosulfate, to be repeated in 15 min. If victim has stopped breathing: give artificial respiration until breathing starts. If victim is unconscious but breathing: give oxygen from an inhalator. For all of above conditions, have victim breathe amyl nitrite. Break nitrite pearl in a cloth and hold lightly under victim's nose for 15 sec., repeating 5 times at about 15-sec. intervals. If necessary, repeat this procedure every 3 min. with fresh pearls until 3 or 4 have been given. (Pearls must not be over 2 years old. Avoid breathing amyl nitrite while administering it to victim.)

### 3. HEALTH HAZARDS

- 3.1 Personal Protective Equipment: Dust mask and goggles or face shield
- 3.2 Symptoms Following Exposure: No adverse effects from inhaling borax have been reported. Ingestion may cause acute or chronic effects; initial symptoms are nausea, vomiting, and diarrhea; these may be followed by weakness, depression, headaches, skin rashes, drying skin, cracked lips, and loss of hair; shock may follow ingestion of large doses and may interfere with breathing. Eye contact with powder or solutions may cause irritation; no chronic effects have been recognized, but continued contact should be avoided. Local skin irritation may result from contact with powder or strong solutions; the latter may cause chronic dermatitis on prolonged contact, and if skin is broken, enough boron may be absorbed to cause boron poisoning (symptoms are similar to those for ingestion).
- 3.3 Treatment of Exposure: INHALATION: move to fresh air; call physician immediately; give mouth-to-mouth resuscitation if breathing has ceased; give oxygen if authorized by physician; keep victim warm. INGESTION: get medical attention quickly; if victim is conscious, give warm salty or soapy water to induce vomiting; repeat until vomitus is clear; additional water may be given to wash out stomach. EYES: get medical attention quickly; flush with copious amounts of water for at least 15 min. (30 min. if physician is not available), holding eyelids apart. SKIN: flush with water; remove contaminated clothing under shower; do not use chemical neutralizers; get medical attention unless burn is minor.

## CAUTIONARY RESPONSE INFORMATION

Common Synonyms	Oily liquid	Yellow to red	Irritating sharp odor
	Mixes and reacts with water. Poisonous vapor is produced.		
Evacuate. Keep people away. Avoid contact with liquid and vapor. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
Fire	Combustible. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with dry chemical, or carbon dioxide. Cool exposed containers with water. Water reacts violently with compound.		
Exposure	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes. Poisonous if inhaled. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Poisonous if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
Water Pollution	Dangerous to aquatic life in high concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Rubber protective equipment, such as apron, boots, splash-proof goggles, gloves; canister-type respirator or self-contained breathing apparatus.
- 3.2 **Symptoms Following Exposure:** Inhalation of mist causes irritation of respiratory tract and possible systemic poisoning; hydrogen sulfide gas, which may be given off when acid is present, causes headache, dizziness, nausea, vomiting; continued exposure can lead to loss of consciousness, respiratory failure, and death. Liquid causes marked eye irritation; itching, lachrymation, swelling, and corneal injury causing blurring of vision are the most common effects; exposure to light may increase the painful effects. Contact of liquid with skin causes irritation and corrosion of tissue; continued exposure may cause dermatitis. Ingestion causes severe burning and corrosion of all portions of the gastro-intestinal tract, pain in the throat and abdomen, nausea, and vomiting, followed by diarrhea. In severe cases, collapse, unconsciousness, and paralysis of respiration may be expected.
- 3.3 **Treatment of Exposure:** INHALATION: move victim from contaminated atmosphere; call physician; if breathing has ceased, start mouth-to-mouth resuscitation. EYES: immediately flush with large quantities of running water for a minimum of 15 min.; obtain medical attention as soon as possible; while awaiting instructions from physician, patient may be kept in a dark room and ice compresses applied to the eyes and forehead. SKIN: immediately flush affected areas with water; obtain medical attention if irritation persists. INGESTION: obtain medical attention as soon as possible; if patient is conscious, induce vomiting by giving large amounts of water or warm salty water (2 tablespoons of table salt to a pint of water); if this measure is unsuccessful, vomiting may be induced by tickling back of patient's throat with a finger. Vomiting should be encouraged until the vomitus is clear. If patient is unconscious, do not give anything but ensure there is no obstruction to breathing (his tongue should be kept forward and false teeth removed). He will be less likely to aspirate vomitus if he is placed in a face-down position.
